SOFTWARE ENGINEER II

Software Engineer with 8+ years of experience (3 years of work experience) in software development, programming, and system design across Windows, Web, and Android platforms. Known for delivering clean, maintainable, and scalable code.

Deployed in Japan as Control System Engineer with hands-on experience in network infrastructure, including switches, routers, firewalls, and Active Directory environments—bringing a full-stack + infrastructure perspective to problem-solving.

TECHNICAL SKILLS

Languages: Java • C# (.NET) • JavaScript • TypeScript • PHP • Python • Batch Script

Frameworks & Tools: React • Laravel • Android Studio • Git • Docker

Databases: MySQL • Firebase Realtime Database

Networking & Systems: Cisco Switches/Routers • WatchGuard Firewall • Windows Server • Active Directory • Domain Controllers
